Sir:

SECOND REQUEST FOR CORRECTION OF FILING RECEIPT

Applicants hereby request correction of the Filing Receipt in connection with the above-identified patent application (copy enclosed). A first Request for Correction of Filing Receipt was mailed November 30, 2001 (copy enclosed). The Request for Correction of Filing Receipt stated that the original Filing Receipt incorrectly listed that the 18th application listed under the Domestic Priority data identified the wrong filing date. Specifically, U.S. Provisional Patent Application Serial No. 60/307,657 was filed July 25, 2001, not July 26, 2001.

Applicants received a Response to Request for Corrected Filing Receipt dated January 17, 2002 (copy enclosed) stating that the "filing date of a parent application cannot be changed by this request. A request for corrected Filing Receipt must be directed to such parent application." Applicants are not requesting that the original, parent provisional application filing date be corrected. In fact, Serial No. 60/307,657 was given the correct filing date, July 25, 2001, upon its original filing. Applicants are merely requesting that the Filing Receipt for this patent

application, Serial No. 09/955,418, be corrected to show the correct filing date for the parent provisional which was mistakenly entered by the Patent Office when the Filing Receipt for this application (Serial No. 09/955,418) was generated by the Patent Office.

Additionally, the Filing Receipt excludes 14 priority applications from which this application claims the benefit of and priority from, as claimed upon filing. Specifically, the following applications have not been included:

Serial No. 09/929,221, filed August 13, 2001
Serial No. 09/929,226, filed August 13, 2001
Serial No. 09/929,227, filed August 13, 2001
Serial No. 09/929,234, filed August 13, 2001
Serial No. 09/929,235, filed August 13, 2001
Serial No. 09/929,236, filed August 13, 2001
Serial No. 09/929,237, filed August 13, 2001
Serial No. 09/929,238, filed August 13, 2001
Serial No. 09/929,240, filed August 13, 2001
Serial No. 09/929,241, filed August 13, 2001
Serial No. 09/929,242, filed August 13, 2001
Serial No. 09/929,244, filed August 13, 2001
Serial No. 09/929,425, filed August 13, 2001
Serial No. 09/929,426, filed August 13, 2001

The Response to Request for Corrected Filing Receipt dated January 17, 2002 fails to note anything about the request to correct the Filing Receipt to include this information, as provided upon filing.

For the Patent Office's convenience, enclosed are copies of pages 1 and 2 of applicants' patent application as filed September 17, 2001 which correctly identifies the filing date for Serial No. 60/307,657, filed July 25, 2001 and which specifically identifies and claims priority to the above-identified U.S. patent applications.

Accordingly, please correct the Filing Receipt to include the correct filing date of U.S. Provisional Patent Application Serial No. 60/307,657, filed July 25, 2001 and to include the 14

U.S. patent applications identified above. Please mail a corrected Filing Receipt to applicants' undersigned attorney.

Respectfully submitted,

LICENSE FOR FOREIGN FILING UNDER Title 35, United States Code, Section 184 Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations

especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

Field of the Invention

The present invention relates to safety systems and more particularly to a safety
system that stops translational motion of a cutting tool in power equipment.

Background

20 Power equipment such as miter saws and radial arm saws include circular blades
that move down onto or across a workpiece to cut the workpiece. Pneumatic up-cut chop
saws often have a blade that rises through a slot in a table to cut a board. The blades,
